

Create an over consumption alarm on GetWay

To create the alarm :

- In the menu bar, select « GetAlarm » → Create alarm
- Select the « Over consumption » alarm

This alarm will monitor the consumption of a specific line or a set of lines

Select the alarm range → CA/Offer

The alarm is automatically associated with existing lines and new activations

- · Select the offer and the desiried billing account
- Define a trigger threshold per usage : Data and/or SMS and/or Voice

Advanced Mode : This mode allows a differentiation between outgoing and incoming usages and to change the observation cycle

- Select « Be notified by e-mail»; using the drop-down menu, select the desired distribution list
- Give a name to the alarm and save the settings by clicking on « Save the alarm »
- · For any request, contact the M2M backoffice : partenaires_data@bouyguestelecom.fr
